Begins with Black Gold**

All the Riches of the Earth

Black Gold natural and organic potting soils, amendments and fertilizers weren't created overnight. The brand was brought to life by a group of dedicated gardeners who had a commitment to sustainability and organic gardening. Our mixes contain rich ingredients, blended to work in balance with nature. OMRI, the Organic Materials Review Institute, independently verifies truly organic products through rigorous testing and approves them for use by Certified Organic Growers. With OMRI listed Black Gold, you can unleash these riches in your home garden.

Premium Quality Potting Soils

These soils create the perfect environment for container growing. Whether you need moisture management for your flowers, an organic blend for your vegetables, or a specialty blend for orchids, cactus or violets, we've got the soils that will make your containers thrive.

Organic Soil Amendments

It's a proven fact... adding organic matter will improve your soil. Our amendments will enhance soil texture, aeration and drainage. These amendments also help retain soil nutrients and moisture. Black Gold OMRI listed garden amendments can help ensure your organic gardening success!

"Whether it's houseplants or containers outdoors, Black Gold has a potting soil formulated to provide the ideal growing environment for all your plant projects."

P. ALLEN SMITH
